

A Useful Tool

For Everyone

Although our Housekeeping video will not clean a dirty unit, it is a valuable tool in your continual struggle with poor housekeeping issues. Dealing with housekeeping concerns robs you of your time and creates personal discomfort when addressing sensitive issues. If not dealt with, it can create risks to residents and your organization because of the health and safety hazards involved. The video breaks down the traditional barriers to successfully deal with these issues. A neutral third party (the video) informs residents of the process to keep a household clean and in compliance with good housekeeping standards that are fairly and consistently applied.

OVERCOMING HOUSEKEEPING OBSTACLES

Inexperienced? Cultural Differences? Language Barriers?

All these things can make it difficult for residents to understand and comply with your organization's housekeeping standards. There is no question that poor housekeeping has the potential to produce unsafe and unsanitary living conditions for residents and their neighbors. This video helps to overcome the following obstacles:

DENIAL

Some residents need a special experience or sign to get their housekeeping done. The video answers the general comment given.
MY HOUSE IS JUST FINE.

CLUTTER

There are households that are generally clean, but you just can't tell because of all the clutter in the way. The video gives tips on organizing a home to make it more livable and easier to maintain.
IT'S CLEAN YOU JUST CAN'T TELL.

SUPPLY

With stores full of cleaning supplies and limited budgets, it is important to let people know what products can work for them and how to save some money.
I DON'T KNOW WHAT PRODUCTS TO USE.

TEACHER

With cultural and regional cleanliness differences, some residents need basic education. The video is a straightforward presentation and is available in multiple languages.
I DON'T KNOW HOW.

WISHY WASHY

What is the standard I need to meet? This legitimate question is answered by SHOWING residents. It sets a uniform standard for residents and staff that can be easily seen and understood.
BUT, EVERYONE DOES IT DIFFERENTLY.

HEALTHY

There are some units that attract bugs, rodents, and disease. This video deals with this critical and delicate issue in a straightforward manner.
HOW DO WE TELL A RESIDENT THEIR UNIT IS UNHEALTHY?

HELPLESS

Many families have not involved all family members with the housekeeping tasks that need to be done. This video offers them a step in the right direction.
HOW CAN I GET ALL THIS DONE?
